

32. A method of providing photodynamic therapy to a subject comprising administering a formulation according to claim 19 to said subject wherein the porphyrin macrocycle photosensitizer, after release from said formulation, is capable of localizing to target tissues or cells, and irradiating said tissues or cells at an appropriate wavelength of light after passage of sufficient time for said porphyrin macrocycle photosensitizer to localize.--

REMARKS

Support for new claims 15-32 is provided at least by the claims as originally filed and following: pages 9, 10, 12, 13, 24 and 25. No new matter has been added and entry of the amendment is respectfully requested.

In the event that the transmittal letter is separated from this document and the Patent Office determines that an extension and/or other relief is required, applicant petitions for any required relief including extensions of time and authorizes the Assistant Commissioner to charge the cost of such petitions and/or other fees due in connection with the filing of this document to **Deposit Account No. 03-1952** referencing docket no. 273012008102. However, the Assistant Commissioner is not authorized to charge the cost of the issue fee to the Deposit Account.

Dated: June 8, 2000

Respectfully submitted,
